HONDA VEHICLE PERFORMANCE, PRICING & INVENTORY INSIGHTS

PROJECT OVERVIEW

This project analyzes Honda vehicle performance, customer perception, pricing behavior, and inventory distribution across models, vehicle conditions, and market segments.

The dashboard combines customer ratings, review popularity, vehicle lifecycle analysis, pricing intelligence, and inventory value frameworks to identify premium models, value opportunities, pricing dynamics, and market positioning trends.

BUSINESS OBJECTIVES

- Identify vehicle models delivering the strongest customer satisfaction and value perception.
- Evaluate how vehicle age influences pricing, reliability, performance, and customer ratings.
- Measure inventory value distribution across vehicle conditions, popularity segments, and geographic markets.
- Identify premium models, high-value inventory segments, and key market concentration areas.
- Assess pricing efficiency and model positioning using customer ratings, review engagement, and inventory value metrics.
- Support data-driven decisions related to vehicle pricing, portfolio management, inventory allocation, and customer perception analysis.

DASHBOARD STRUCTURE

01 VEHICLE PERFORMANCE & CUSTOMER PERCEPTION

Explore vehicle performance, customer ratings, reliability, and model positioning insights.

02 VEHICLE PRICING & INVENTORY INSIGHTS

Analyze pricing trends, inventory value distribution, and inventory performance.

03 EXECUTIVE ACTION PLAN

View top 10 strategic recommendations and key expected outcomes.

04 SEGMENTATION FRAMEWORK & BUSINESS DEFINITIONS

Understand segmentation framework, key segments, and business definitions.

SEGMENTATION FRAMEWORK & BUSINESS DEFINITIONS

METHODOLOGY

Segmentation thresholds were established using distribution analysis, histogram evaluation, and percentile assessment to create meaningful business categories while maintaining balanced representation across the vehicle portfolio.

REVIEW VOLUME CATEGORY

Purpose

Classifies vehicle models based on customer review volume to measure market visibility, customer engagement, and overall popularity.

VEHICLE AGE CATEGORY

Purpose

Groups vehicles according to age relative to the 2023 marketplace to evaluate pricing behavior, customer perception, and lifecycle maturity.

REVIEW VOLUME CATEGORY

CATEGORY	REVIEWS
Niche Model	< 150
Emerging Favorite	150 – 749
Popular Model	750 – 1999
Consumer Favorite	≥ 2000

VEHICLE AGE CATEGORY

CATEGORY	VEHICLE AGE
New Model	0 – 2 Years
Recent Model	3 – 5 Years
Mature Model	6+ Years

ANALYTICAL APPLICATIONS

- Review Volume Categories were used to analyze inventory value concentration and market popularity dynamics.
- Vehicle Age Categories were used to evaluate price depreciation patterns and customer perception across vehicle lifecycle stages.

Accord Crosstour
